11.2% of Australians have asthma

1 IN 9 AUSTRALIANS ARE AFFECTED BY ASTHMA
2.7 million people

In 2017–18
38,792 Australians were hospitalised

Approximately 80% of asthma hospitalisations are preventable

Almost half (44%) of the hospitalisations for asthma in Australia are for children aged 0–14.

Asthma hospitalisations have plateaued over the last decade
