#### **Presentation "Influencing change and understanding our Impact"**

Asthma is a serious problem which demands our attention and creativity to find a better way forward. However, asthma is complex, as are the systems which enable or hinder better outcomes.

With so many options, our challenge has been understanding where to invest our time, talent and resources to maximise impact.

We have a carefully considered strategy to design and **test new approaches** and to work differently so we **drive better, measurable outcomes** for people with asthma in communities and at scale.

At our Annual General Meeting, we are delighted to share the progress we are making for people with asthma through an impact lens.
